Put away for two years in KIA

This is a reaction on the writing in the DIARIO of December 23rd 1998. Undersigned will like to comment that he agrees with what is written in the news paper regarding the drug addicts on the island.

Are they not willing to go into treatment they should be put away for at least two years in KIA or some other place adequate for them to kick off the habit they have. The problem of drug affects us all in various ways, e.g.:

- Relatives or friends who have this addiction.
- The community who are terrorized by the behavior of these addicts.

• The existing danger of the AIDS virus being spread over this small island, seeing that most of these addicts have wives or husbands that they go back to.

It is time we attend the growing problem that we have here on the island, before it is too late.

Most addicts will not go into treatment willingly, so they should be aware if they are not willing to kick this habit off on their own they will be excluded from the community for some time.

There should be law against the use of drugs, with a minimum sentence of two months shut off from the community. Also there should be a minimum sentence of at least 15 years to those selling drugs to these addicts, as they are primarily responsible for the problems of these addicts.

There seem to be no control, certain areas are very known to be drug centers, but there seem to be no regularly burst on these drug centers.

We seem to put more emphasis on big burst, but if you look around most drug addicts are addicted from the use of drugs from these dug centers (houses or shack).

We all should get involved before it is too late, just look around you, do not turn the other cheek as there might be a friend, a brother, an uncle who might be caught up in this addiction.

Thanks for the opportunity for being able to share this opinion with you.

Santa Cruz.
